## DETAILED ACTION

***The restriction in the last Office action is hereby withdrawn in view of Applicant's Amendment.***

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-33 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-64 of copending Application No. 09/710,560. Although the conflicting claims are not identical, they are not patentably distinct from each other because the only difference between two applications are the fluorescent dye and the polymeric resin matrix of the instant claims are not in the fluorescent polymeric layer and the ultraviolet light screening layer, as in the claims of the reference.

However, the instant claims do disclose said layers in claims 26-27 and the required reactants, as required in the claims of the reference. Therefore, it would have been obvious to one of ordinary skill in the art to combine these components of the instant claims, as stated above, to form the claims of the reference since they have

Art Unit: 1711

been shown to be effective in a similar system and thus would have been expected to provide adequate results. There is no showing of unexpected results derived from said combination.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
